

SENIOR HIGH ACCOMMODATIONS

Alternative Education

We work to:

Make contact with each student by accepting and accommodating individual differences

Consult with students to encourage decisions about learning

Utilize student interests by sharing experiences and ideas

Participate with community for learning

Focus on the largest unit of knowledge - learning life and emphasizing life-long learning

Have each individual create visions of the future to develop positive self-fulfilling prophecies

Encourage a balance of reflection and action using a working journal to outline ideas, record learning, interests, struggles

Enhance the transfer of reflections into strategies for action

Promote achievement of students by using work experiences, projects, observations, performances and testimonials

Develop multiple community connections for student success
